In the Specification:

Please amend the specification as follows:

Please replace the text at page 69, lines 3-16, with the following:

n [is a child of] [president james monroe ~~hugh tunstall-pedoe~~]

and all similar lines with another variable are represented by the single queryline object:

[queryline: [queryline unknown]; [is a child of]; [president james monroe ~~hugh tunstall-pedoe~~]]

To say that <u>President James Monroe</u> ~~Hugh Tunstall-Pedoe~~ has (has ever had) three children we then include the following fact in our knowledge base:

[fact.000269@semscript.com]: [queryline: [queryline unknown]; [is a child of]; [president james monroe ~~hugh tunstall-pedoe~~]] [has order] [integer: ["3"]]
